DETAILED ACTION

1. The Examiner has carefully considered Applicant's supplemental amendment filed September 24, 2004. The rejections have been maintained.

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 14-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Blommer et al. (US 4,989,493) in view of Fischer et al. (US 4,594,290). Blommer et al. disclose a structure for attenuating explosive shock waves to prevent propagation of accidental explosions (abstract). The structure comprises a center sheet of steel surrounded by aluminum, poly methyl methacrylate (PMMA) acrylic plastic, and a rigid foam made from a 50/50 mixture of glass microballoons and a polyurethane resin (col 3, ln 34-40). It should be noted that the Examiner is equating Blommer's aluminum layer to Applicant's rear layer (as shown on page 5 of 6 of present specification) and Blommer's glass microballoons to the glass brittle covering in Applicant's invention. Blommer et al. disclose the claimed invention except for the teaching that the armor layer is slanted oriented relative to the expected trajectory of the oncoming projectile.

Fischer et al. disclose an impact resistant laminate that includes a first ply, which is disposed in the direction of an expected impact (col 1, ln 62-64). The first ply can comprise glass or polymethyl methacrylate (col 2, ln 19-20). It would have been obvious to one having ordinary

Art Unit: 1771

skill in the art to have used Fischer's teaching of disposing the front ply in the direction of an expected impact on the structure of Blommer et al., motivated by the desire to create an explosion-attenuating device that has increased explosion attenuation.

With regard to claims 24 and 25, it would have been obvious to make the armor layer transparent or opaque, motivated by the desire to create a laminate having a desired aesthetic appearance.

With regard to newly added claims 32 and 33, although the combination of Blommer et al. and Fischer et al. fail to specifically disclose "plates", it is the Examiner's position that it would have been obvious to one having ordinary skill in the art to have made the poly methyl methacrylate (PMMA) acrylic plastic into a plate, motivated by the desire to create a device having increased explosion attenuation. Furthermore, the front surface of Blommer et al. and Fischer et al. is coextensive with the armor layer.

Response to Arguments

4. Applicant's arguments with respect to claims 14-31 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Molari, Jr. (US 4,169,181) discloses an impact resistant laminate comprising a glass front layer and an epoxy resin sheet having good clarity.

Art Unit: 1771

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ula C Ruddock whose telephone number is 571-272-1481. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Terrel H. Morris can be reached on 571-272-1478. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
